01

Executive Summary

TENEX is a community-built project on Solana that pairs a fair-launched token, $TENEX, with a collection of 777 Genesis Gods NFTs and a companion token, Tenex Cash ($TXC). Every NFT mint feeds the token: part of each mint automatically buys $TENEX on the open market and burns it forever, and part funds a staking pool that pays $TENEX to holders who stake their Gods.

Most new tokens launch with a logo, a chart and a promise. TENEX launched with a working product stack. Within its first three weeks the project shipped a live NFT mint, an automated on-chain buyback-and-burn, a non-custodial staking system with a 10,000,000+ $TENEX reward pool, a public charity pledge and an enhanced DexScreener profile, graduated from the Pump.fun bonding curve to PumpSwap, and launched $TXC with a fee-share burn that turns TXC trading into $TENEX burns. All of it is verifiable on-chain.

The long-term goal is to turn $TENEX from a token you hold into money you can spend. Tenex Crypto Cash is the plan to let holders spend the value of their $TENEX through a card offered with licensed card-issuing partners where legally permitted. It is in development, and details will be announced only once confirmed. $TXC is planned as the card's rewards token.

02

The Problem We Are Solving

Thousands of tokens launch on Solana every day. Most share the same weaknesses:

- **No reason to hold.** Once the launch hype fades, nothing connects the token to anything that creates ongoing demand.
- **Hidden supply.** Presales, insider wallets and team allocations sit over the market and get sold into buyers.
- **No accountability.** Promises are made in chat and never shown on-chain.
- **No path to the real world.** Value stays locked on a chart with no way to use it.

TENEX is built to answer each of these directly: real utility that creates recurring demand, a supply with no hidden allocations, mechanics that anyone can verify on-chain, and a clear long-term vision for spending $TENEX in daily life.

03

Our Principles

Fair

Launched publicly on Pump.fun. No presale, no private round, no team bags.

Verifiable

Burns, staking payouts and project wallets are public. If we say it, you can check it.

Useful

Every product we ship either creates demand for $TENEX, reduces its supply or rewards the people who hold it.

Community-first

Holders vote, contests pay out on-chain, and the team is drawn from the community.

Giving back

$10,000 is pledged to teach kids to swim. A project should leave something good behind.

04

The $TENEX Token

$TENEX was fair launched on Pump.fun on November 7, 2026. Anyone could buy from the first block on equal terms. The mint authority and freeze authority are both revoked, so no new $TENEX can ever be created and no wallet can ever be frozen.

NAME / TICKER	TENEX / $TENEX
BLOCKCHAIN	Solana
TOKEN STANDARD	SPL Token-2022 with on-chain metadata
CONTRACT ADDRESS	`GpCiqGaWm9Lk98r8iFr5W32dkFMVq8suBRDdkfqbpump`
INITIAL SUPPLY	1,000,000,000 $TENEX
SUPPLY AFTER BURNS	946,854,366 $TENEX on November 27, 2026 (over 53.1 million burned). Live figure on Solscan.
DECIMALS	6
MINT AUTHORITY	Revoked (fixed supply, can only go down through burns)
FREEZE AUTHORITY	Revoked
PRESALE / TEAM ALLOCATION	None / None
LAUNCH	Pump.fun fair launch, November 7, 2026
CURRENT MARKET	PumpSwap TENEX/SOL pool. Graduated from the Pump.fun bonding curve on November 24, 2026.
LAUNCH LIQUIDITY	LP tokens burned at graduation, so the launch liquidity can never be withdrawn

DEFLATIONARY BY DESIGN

Because the supply is fixed and no new tokens can be minted, every burn permanently reduces the total supply. Burns are funded by real activity (NFT mints, $TXC trading fees and the graduation BOOST), not by taking tokens from holders.

GRADUATION BOOST BURN	51,367,302 $TENEX bought and burned through Pump.fun's BOOST at graduation, November 24, 2026
NFT-FUNDED BUYBACKS	1,694,825 $TENEX
$TXC FEE-SHARE BURNS	49,143 $TENEX (first burn November 26, 2026)
OTHER ON-CHAIN BURNS	Over 34,000 $TENEX
TOTAL BURNED	Over 53,145,000 $TENEX, about 5.3% of the initial supply (November 27, 2026)

05

The Value Engine

The Genesis Gods collection and $TXC trading are the two engines that power $TENEX. Each mint is priced at $77.77 (paid in SOL or USDC), and that revenue is routed into the token automatically.

7.77%	**Buyback & burn.** Of every mint buys $TENEX on the open market and burns it permanently.
2%	**Staking pool.** Of every mint buys $TENEX and sends it to the God Staking reward pool.
7.77%	**Creator royalty.** On secondary NFT sales. A share of royalties refills the staking pool.

33.69%	**Locked liquidity (at sellout).** If the collection sells out, a third of profits is locked into $TENEX liquidity to strengthen the market for every holder. The community votes on how long the liquidity stays locked, with a minimum of one year and the option to lock it permanently.
7.77%	**Sellout Reward Pool (at sellout).** If the collection sells out, 7.77% of all mint SOL buys $TENEX and airdrops it to NFT holders, scaled by rarity, after the reveal.
50%	**$TXC fee-share burn.** Of all $TXC creator trading fees goes to the TENEX burn wallet, which buys $TENEX on the open market and burns it. See Tenex Cash ($TXC).

HOW THE BUYBACK RUNS

The buyback is fully automated. Every four hours a script checks the mint machine for new sales and claims any $TXC fee share, swaps the owed amount into $TENEX through Jupiter, burns the burn share in the same run, sends the staking share to the reward pool, and posts a public burn alert with the Solscan transaction link to the TENEX Telegram and Discord. No one has to remember to do it, and anyone can audit it.

> **Live proof:** the first mint-funded burn destroyed 1,016,385 $TENEX on November 20, 2026, and the first $TXC-funded burn destroyed 49,143 $TENEX on November 26, 2026. Total burned to date is shown live at the top of tenexcrypto.com and can be verified on Solscan.

LOCKED LIQUIDITY

Liquidity comes first. NFT mint proceeds and developer buys go into a public liquidity fund wallet, tracked live at the top of tenexcrypto.com with a goal of $20,000. When the fund reaches $10,000, it is planned to be added to the TENEX/SOL pool and time-locked on-chain through a public locker, with the lock published, and the same is planned for the next $10,000. This covers the roughly $20,000 (33.69% of mint revenue at sellout) liquidity commitment made for the Genesis Gods collection.

06

Genesis Gods NFT Collection

The TENEX Genesis Gods are 777 hand-forged guardians of the $TENEX universe: Kings, Angels, Pharaohs, Mystics and elemental gods of fire, frost, storm, void and tide. Every God is one of a kind. Each one arrives sealed and is revealed to the world on February 1, 2027.

SUPPLY	777 Genesis Gods
STANDARD	Metaplex Core on Solana
COLLECTION ADDRESS	`FC9b9GFhEkiJdQtDwVTEqSisTeRHrxTrUqyv6P877McP`
MINT PRICE	$77.77, payable in SOL or USDC (SOL price updated automatically to track $77.77)
WALLET LIMIT	None
CREATOR ROYALTY	7.77%, enforced on-chain
REVEAL	February 1, 2027
WHERE TO MINT	Only at tenexcrypto.com

RARITY

The 777 Genesis Gods are divided into rarity tiers. Every God is a unique artwork, with themes spanning Kings, Angels, Pharaohs, Mystics and elemental gods of fire, frost, storm, void and tide.

TIER	SUPPLY	ODDS PER PUBLIC MINT
Genesis God (Royal)	**7**	About 1 in 111
Legendary	**14**	About 1 in 55
Epic	**56**	About 1 in 14
Rare	**140**	About 1 in 6
Uncommon	**280**	About 1 in 3
Common	**279**	About 1 in 3

SPECIAL EDITIONS

7

GENESIS GOD ONE-OF-ONES

The Royal tier. About 1 in 111 per mint.

5

CROWNED ROYAL ONE-OF-ONES

One hidden inside each tier from Common to Legendary.

Odds are approximate. Which God holds which tier stays sealed until the reveal on February 1, 2027. Rarer Gods receive a larger share of the Sellout Reward Pool.

WHAT A GOD UNLOCKS

A Genesis God is more than art. It is your key to the TENEX ecosystem, and every new product is built to reward the people who hold one.

Vote

God holders get a voice in TENEX community votes, from charity picks to the first real-world use case.

Stake

Stake your God to earn weekly $TENEX rewards from the God Staking pool.

Spend

Genesis God holders are planned to earn extra perks on the Tenex Crypto Cash Card, including higher rewards when they spend. The card is in development.

Belong

Holding a God (plus $100+ of $TENEX) is part of the eligibility to join the TENEX team.

A PROVABLY FAIR REVEAL

The collection uses hidden settings: a cryptographic hash of the reveal assignment was committed on-chain when the mint machine was deployed. That hash cannot be changed afterward, which means the order of the reveal was locked before anyone minted and cannot be rearranged in anyone's favor.

07

God Staking

Stake a Genesis God at tenexcrypto.com/stake and earn a weekly share of the $TENEX reward pool. Staking is live today.

- **Non-custodial.** Your God never leaves your wallet. Staking places an owner-controlled lock on the NFT, and you can unstake at any time.
- **Weekly distributions.** Each week about 1/26 of the pool is shared among staked Gods, weighted by how long each God was staked that week.

- **Every staker is paid.** Every staked God earns its share, even if the wallet holds no $TENEX yet. The payout creates the $TENEX account for new holders automatically.
- **Replenishing pool.** Seeded with 10,000,000 $TENEX and topped up automatically by 2% of every mint and a share of NFT royalties.
- **No insider payouts.** Wallets controlled by the project are excluded from rewards. Their share is calculated as if paid and then stays in the pool for holders.

> Staking rewards are not fixed and not guaranteed. There is no fixed APY: each holder's reward depends on the size of the pool and how many Gods are staked.

08

Holder Rewards

UNLOCK THE GODS

Every mint moves the whole community toward shared milestones:

25% MINTED	Holder-only channel opens
50% MINTED	Holders vote on the next charity
75% MINTED	Reveal-day perks and AMA priority for holders
100% SELLOUT	The Sellout Reward Pool unlocks

SELLOUT REWARD POOL

If all 777 Gods are minted, 7.77% of all mint SOL buys $TENEX on the open market and is airdropped to Genesis Gods holders after the February 1 reveal, scaled by rarity. The rarer the God, the larger the share.

DOUBLE HOLDER

Holders who own both a Genesis God and at least $100 worth of $TENEX at the February 1 snapshot receive double their share of the Sellout Reward Pool. The $TENEX value is measured

at the market price at the time of the snapshot. It rewards the people who back both halves of the ecosystem.

EARLY MINTER BONUS

The first 100 Genesis Gods minted each receive a bonus of 250,000 $TENEX, with no limit per wallet. The bonus is paid on the Friday staking payout day to the wallet holding the God, from a dedicated, fully funded bonus wallet that anyone can check on Solscan. The first six Gods were paid on November 28, 2026.

TOP HOLDER AWARD

If the collection sells out, the wallet holding the most Genesis Gods at sellout receives $777.77, paid in $TENEX or SOL, the winner's choice. Wallets controlled by the project are excluded. If two or more wallets tie, the award is split equally between them.

REWARDS FOR THE LIFE OF TENEX

Genesis Gods are built to be rewarded for the entire life of TENEX and Tenex Cash. Holders are planned to receive continuous rewards across the ecosystem, from weekly God Staking and holder bonuses to extra perks and higher rewards on the Tenex Crypto Cash Card. As new products launch, Genesis God holders are first in line.

> Specific rewards, amounts and products may change as the project grows. Rewards are not guaranteed, and the card is in development.

09

Tenex Crypto Cash

The long-term goal is to turn TENEX from a token you hold into money you can spend.

Tenex Crypto Cash is the plan to let holders spend their $TENEX directly through the Tenex Crypto Cash Card, offered with licensed card-issuing partners where legally permitted. You do not need to stake to spend: any $TENEX you hold can be loaded and used. Card rewards are planned to be paid in Tenex Cash ($TXC), Genesis God holders are planned to earn extra card perks, including higher rewards when they spend, and staking a God adds bonus rewards on top. The intended holder journey:

01
BUY $TENEX

02
LOAD THE CARD

03
SPEND $TENEX

04
EARN REWARDS IN $TXC, WITH EXTRA PERKS FOR GENESIS GOD HOLDERS

Status: in development. No card-issuing partner has been announced. Card programs are regulated and depend on licensed partners, compliance review and availability by country. Details, partners and timelines will be announced only once confirmed. Card artwork shown by the project is concept design.

10

Tenex Cash ($TXC)

$TXC is the companion token to $TENEX and the planned rewards token for the Tenex Crypto Cash Card. Every TXC trade feeds the TENEX ecosystem.

Tenex Cash launched publicly on Pump.fun on November 26, 2026. Its creator trading fees are split 50/50 on-chain through Pump.fun's creator fee sharing, and the split is permanent: it cannot be changed again.

50%	**Burns $TENEX.** Sent to the TENEX burn wallet. The automated system claims it, buys $TENEX on the open market and burns it permanently, then posts the claim, buy and burn transactions publicly.
50%	**Builds the project.** Funds development, including the Tenex Crypto Cash Card program.

HOW THE FEE-SHARE BURN RUNS

Every four hours the automation calls Pump.fun's permissionless fee distribution for $TXC, which pays each shareholder wallet directly. Once the burn wallet's share reaches 0.01 SOL, it buys $TENEX through Jupiter and burns exactly what it bought. Each burn is announced on X, Telegram and Discord with Solscan links. Trade TXC, burn TENEX.

> **Live proof:** the first fee-share burn ran on November 26, 2026: claim (an exact 50/50 split), buy and burn of 49,143 $TENEX.

THE CARD REWARDS PLAN

- $TXC is planned as the rewards token of the Tenex Crypto Cash Card.
- Rewards are planned to be paid in $TXC at its market price at the time of payout.
- Rewards are designed to be funded by project revenue, never by creating new tokens: $TXC mint authority is revoked.

NAME / TICKER	Tenex Cash / $TXC
BLOCKCHAIN	Solana (SPL Token-2022)
CONTRACT ADDRESS	`38RE7ZQZ8Y4DmnHE6iuceWQkQE6T2qZkJyB9YfcSpump`
TOTAL SUPPLY	1,000,000,000 $TXC, fixed
DECIMALS	6
MINT / FREEZE AUTHORITY	Revoked / Revoked
LAUNCH	Pump.fun public launch, November 26, 2026
DEVELOPER HOLDING	50,000,000 $TXC (5%), bought at launch from the public TENEX dev wallet
FEE SPLIT	50% TENEX burn wallet / 50% project development, permanent
CURRENT MARKET	Pump.fun bonding curve. Live on DexScreener.

11

Giving Back

TENEX has pledged $10,000 to the Florida Swims Foundation, the charity arm of the Florida Swimming Pool Association, to fund swim lessons for kids:

- $5,000 when the Genesis Gods collection sells out
- $5,000 more when $TENEX reaches a $1M market cap

Drowning is a leading cause of accidental death for young children, and a few lessons can change that. When the donations are made, receipts will be shared publicly.

12

Proof of Work: The First Three Weeks

A roadmap is easy to write. This is what TENEX has already shipped since launching on November 7, 2026:

- Fair launch on Pump.fun with no presale and no team allocation
- Official website at tenexcrypto.com with live token data, live burn tracker and on-site minting
- Telegram, X, Discord, Instagram, TikTok and LinkedIn, plus a buy bot
- DexScreener enhanced token profile, and listing on GeckoTerminal
- 777 Genesis Gods collection deployed on Metaplex Core with a provably fair hidden reveal; mint live
- Automated buyback & burn live; over 53.1 million $TENEX burned in total
- Graduated from the Pump.fun bonding curve to PumpSwap on November 24, 2026, with launch liquidity burned
- Tenex Cash ($TXC) launched November 26, 2026, with an automated 50/50 fee-share burn into $TENEX; first burn completed the same day
- Applications submitted to Jupiter verification, CoinGecko and CoinMarketCap
- God Staking live with a 10,000,000+ $TENEX reward pool and automated weekly payouts
- Weekly community contests with winners paid on-chain
- $10,000 charity pledge and a growing volunteer team

13

Transparency & Security

Everything that matters is on-chain and public. These are the official addresses:

$TENEX TOKEN	GpCiqGaWm9Lk98r8iFr5W32dkFMVq8suBRDdkfqbpump
GENESIS GODS COLLECTION	FC9b9GFhEkiJdQtDwVTEqSisTeRHrxTrUqyv6P877McP
MINT MACHINE	49vxsqr4C4YnopTdtg5BuU7coMY3KatmdCPwnQQkfUW2
BUYBACK & BURN WALLET	CrAKHrZASssGaJrXAqtRUKox5AEaoyeKDduqA5iesFUY
STAKING REWARD POOL	GSretJmSxXsqv5ezVvdtXVjUsZ4byNkSurmoE9TqehFe
TENEX DEV WALLET	4N5512QtJKyLTjkXJyfPV6VpV8qiQ1Dp18pC5mQubNU5
$TENEX PUMPSWAP POOL	3xGFZpmpyXomLAoy5PuyiHJnFTGfeEakpn9SHx5NsLAG
$TXC TOKEN	38RE7ZQZ8Y4DmnHE6iuceWQkQE6T2qZkJyB9YfcSpump
$TXC FEE-SHARING CONFIG	8get5oXbpDNoQusLzFkxkJoNxyARUtcm77vVuWxpe9ah

- **Fixed supply.** Mint and freeze authority are revoked on both $TENEX and $TXC.
- **Burned launch liquidity.** The $TENEX launch LP was burned at graduation and can never be withdrawn.
- **Separated wallets.** Buyback, staking and treasury funds are held in separate wallets with single purposes.
- **Hardware security.** Project treasury keys are held on a hardware wallet.
- **Public alerts.** Every automated burn, including every $TXC fee-share burn, is announced with its transaction links.
- **Anti-scam policy.** Mint and stake only at tenexcrypto.com. The team will never DM you first or ask for your wallet or seed phrase.

14

Community & Team

TENEX is built by its community. The founder and developer launched the token publicly and runs development. The core team was drawn from the community:

FOUNDER & DEVELOPER	Builds and maintains the token systems, NFT collection, staking, website and automation
JULIUS CRYPT	Head Boss: leads the squad
WEBGURU	Mod Boss: runs the chat and answers questions
TSYRIM	Mod Boss: keeps the chat safe and answers questions
GREKO_FI	Raid & Marketing: leads X raids and promotion

Anyone can earn a place on the team by holding $TENEX and staying active. Holders have a voice through votes on charity, promotion funds and the first real-world use case.

15

Roadmap

Phase 1 · Launch

DONE

- Fair launch on Pump.fun
- Telegram, X and website
- Buy bot

Phase 2 · Build the Utility

DONE

- Genesis Gods mint live
- Automated buyback & burn
- God Staking and weekly payouts
- DexScreener enhanced profile, GeckoTerminal listing
- Instagram, TikTok and Discord

Phase 3 · Bond It

DONE

- Graduated to PumpSwap on November 24, 2026, launch LP burned
- 51.4M $TENEX burned through the graduation BOOST
- Jupiter verification, CoinGecko and CoinMarketCap applications submitted

Phase 4 · Tenex Cash

NOW

- $TXC launched with a permanent 50/50 fee-share burn into $TENEX (done)
- Automated TXC-to-TENEX burns with public proof (live)
- $TXC DexScreener profile
- Community AMA with the developer
- Developer liquidity added to the pool and time-locked once it reaches $10,000
- CoinGecko resubmission and data-site profiles
- Open-source release of the burn and staking toolkit, and ecosystem grant applications

Phase 5 · The Reveal

FEB 1, 2027

- Genesis Gods reveal and rarity rankings
- Sellout Reward Pool airdrop by rarity, with Double Holder bonus (if the collection sells out)
- Locked liquidity and charity donation at sellout

Phase 6 · Expand

NEXT

- CoinGecko, CoinMarketCap, DEXTools, Birdeye and Solscan profiles for $TENEX and $TXC
- Monthly AMAs, Spaces and cross-community raids
- Merch and first real-world campaigns
- Long term: centralized exchange listings

Phase 7 · Go Real World

VISION

- Holder vote on the first real-world use case
- Tenex Crypto Cash Card with licensed card partners, where legally permitted
- Card rewards paid in $TXC

Roadmap items are goals, not commitments. Order and timing may change with market conditions, partner availability and regulation.

16

Growth Plan & Partnerships

Now that $TENEX has graduated from the bonding curve, TENEX intends to pursue ecosystem grants, strategic partners and aligned funding to accelerate what is already working. Priority uses of any such funding:

- **Security:** independent review of the staking, buyback and fee-share burn code
- **Open source:** publishing the buyback, fee-share burn and staking tools so other Solana projects can prove their burns and rewards on-chain
- **Tenex Crypto Cash:** legal, compliance and partner integration work for the card program and its $TXC rewards
- **Liquidity & listings:** deeper liquidity and applications to data sites and exchanges

- **Product:** Website 2.0, holder dashboard and expanded staking features
- **Community growth:** contests, content, events and real-world campaigns

Partners and grant providers can reach the project through the official channels listed at the end of this document.

17

Risk Factors

Volatility. $TENEX and NFT prices can rise or fall sharply, including to zero. Only use money you can afford to lose.

Early-stage market. $TENEX trades on PumpSwap with limited liquidity, and $TXC still trades on the Pump.fun bonding curve. Large trades can move either price significantly.

Fee-share burns vary. $TXC fee-share burns depend on $TXC trading volume. They may be small or stop entirely, and no burn amount is guaranteed.

No guaranteed returns. Burns, staking rewards and airdrops do not guarantee any price outcome. Staking rewards vary and may stop if the pool is depleted.

Conditional rewards. The Sellout Reward Pool, sellout locked liquidity commitment and first charity donation depend on the collection selling out. $TXC card rewards depend on the card launching.

Technology. Smart contracts, wallets, Solana, Jupiter and third-party services can fail or be exploited.

Regulation. Laws on digital assets and card programs are changing and differ by country. The Tenex Crypto Cash Card depends on licensed partners and may not be available everywhere, or at all.

Key people. The project depends on a small team. Loss of key contributors could slow development.

Legal Disclaimer
